

Meshwork 'CROSSdesign'

Alternatively to Lindner's common surfaces, we can furnish our metal ceilings with a special surface structure which emulates the appearance of meshwork. This unique three-dimensional visual appearance is achieved with the combination of embossing and perforation.

The metal ceiling panel with 'CROSSdesign' surface can be equipped with different sound absorbing inlays depending on the demands concerning acoustics.

We recommend our common powder coating colours RAL 9006 or 'brillant metallic' as finish. Nevertheless, all colours from the RAL or NCS colour system can be chosen as finish.

Technical Data:

Material	Perforation	Dimensions in mm	Open area
Steel	Meshwork small	w = 10 t = 18	28 %
Steel	Meshwork large	w = 15 t = 27	52 %

It may neither be duplicated, exploited for profit, distributed for business purposes nor shown to any third parties without our approval. Please note that all details, schemes, pictures and dimensions shown in this catalogue are without commitment and might vary due to final project requirements. Especially all figures shown in inch are rough dimensions only. Our O&M manuals, installation Recommendations, Product Specification Sheet, etc. and the installation of Lindner products are exclusively foreseen for persons with special metal ceiling knowledge. For safety reasons all others are not allowed to use Lindner's products. Lindner ceilings must be installed as a complete system. Missing, wrong or by other products substituted components, additional loads by services for e.g. luminaires and not by Lindner approved anchors can cause failure of the complete ceiling system. Lindner ceilings are high-quality products for the interior only. All in our documents mentioned performances are subject to correct installation according to our company's manuals and Standard Terms and Conditions
