

Riverview Building MSD

Prague, Czechia

Project Description

The Riverview office building is located in Prague 5 – Smíchov, one of the rapidly growing districts of the Czech capital. Situated between Svornosti and Hořejší nábřeží streets, directly on the banks of the Vltava River, the building, completed in 2014, offers 6,438 m² of modern office space with views over the river. The combination of architectural elegance, expansive window facades flooding interiors with natural light, and a sustainable energy concept makes this building truly distinctive. Riverview holds the [LEED Gold certification](#), a mark of environmentally friendly construction and top-tier energy efficiency.

LMD-St 213 Expanded Metal Ceiling

For the Riverview office building, the Lindner Group manufactured and supplied the proven LMD-St 213 expanded metal ceiling system. Delivery was carried out in partnership with Konstruktis Delta s.r.o., while professional installation was performed by Albatros design s.r.o.

The LMD-St 213 expanded metal ceiling impresses with its flexible design options and high functionality in daily operation. Each ceiling panel is hinged, providing an exceptionally maintenance-friendly solution for access to the ceiling void.

Thanks to its high-quality white finish and the delicate appearance of the expanded metal, the system integrates seamlessly into the building's overall architectural concept. The combination of natural materials, modern ceiling construction, and thoughtful design creates a harmonious and productive working atmosphere.
